

Say what? Effective ATC communications and Traffic Pattern Gates

(1)Effective ATC radio communications are key to a successful and safe flight. This seminar will review important frequencies, call up procedures, and how to use your radio for increased safety and utility. (2)Traffic patterns got you down? We'll go over some great techniques that can help you make a better pattern -- and better landing -- every time.

Directions: From the North: Take I-35 southbound past Waco. Turn northwest onto W. Loop 340 (Exit 330A). Turn southwest onto Woodway Drive (SH 84). McGregor Airport will be on your right after passing Speegleville Road. After main entrance, take 2nd right turn to the EAA Hangar. From the South: Take I-35 northbound to Exit 322. Continue northbound on the Frontage Road until you can cross under I-35 onto Old Lorena Road (FM 2837). Go northwest on Old Lorena Road (FM 2837) to SH 84. Turn left (westbound) onto SH84. McGregor Airport will be on your right. After main entrance, take 2nd right turn to the EAA Hangar.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
